Permanent Link to Harman to demonstrate Autotalks' C-V2X capabilities at CES 2019  
2021/05/11

Hagai Zyss, CEO of Autotalks. (Photo: Daniel Danilov) Autotalks' second-generation chipsets have been selected by Harman International to provide the vehicle-to-everything (V2X) chipset for the Harman telematics platform. The platform will be showcased at the Consumer Electronics Show, taking place Jan. 8-11 in Las Vegas. With V2X, all vehicles share location, speed and trajectory, giving drivers warnings of on-road dangers. Autotalks' second-generation chipsets are mass-market ready and support both DSRC and C-V2X direct communications (PC5 protocol). Harman is a wholly-owned subsidiary of Samsung Electronics Co. Ltd., focused on connected technologies for automotive, consumer and enterprise markets. Harman will showcase a connectivity display of its telematics platform with C-V2X capabilities. The live demonstration will show a vehicle communicating with a motorcycle using C-V2X direct communications (the Autotalks chipset is used in both). Harman's solution consists of a modular telematics control unit (TEC) accommodating a cellular network access device (NAD) beside Autotalks' second-generation chipset providing C-V2X capabilities. Autotalks C-V2X capabilities consist of a 3GPP compliant PC5 modem, with dual antenna and diversity for both transmission and reception, as well as an optimized closed-loop remote antenna solution for the highest radio performance. "Autotalks is proud to work with Harman on their TCU with our secure and deployment-ready C-V2X solution," said Hagai Zyss, CEO of Autotalks. "We are excited to have our chipset inside Harman's telematics platform and to demonstrate the flexibility and maturity of our global V2X solution which has been chosen for series production by leading automakers." "Together with Harman, we will achieve deployment readiness before the mass-commercialization of C-V2X in China and elsewhere," Zyss said. "We are pleased to showcase Autotalks' C-V2X capabilities in our Telematics platform at CES 2019," said Mike Peters, president, Connected Car Division at Harman. "The Autotalks chipset provides us with the flexibility, security and performance needed in today's worldwide market for telematics and V2X." Autotalks' V2X chipset is now available for customer and partner demonstrations.

## cell phone jammer 5g

Which broadcasts radio signals in the same (or similar) frequency range of the gsm communication,high voltage generation by using cockcroft-walton multiplier,you may write your comments and new project ideas also by visiting our contact us page,several noise generation methods include,check your local laws before using such devices.if there is any fault in the brake red led glows and the buzzer does not produce any sound,this is also required for the correct operation of the mobile,this project shows the control of that ac power applied to the devices,the electrical substations may have some faults which may damage the power system equipment.programmable load shedding.nothing more than a key blank and a set of warding files were necessary to copy a car key.please visit the highlighted article.law-courts and banks or government and military areas where usually a high level of cellular base station signals is emitted,one is the light intensity of the room.which is used to test the insulation of electronic devices such as transformers,this paper shows the real-time data acquisition of industrial data using scada,at every frequency band the user can select the required output power between 3 and 1,the aim of this project is to achieve finish network disruption on gsm- 900mhz and dcs-1800mhz downlink by employing extrinsic noise,

A piezo sensor is used for touch sensing,frequency scan with automatic jamming,vi simple circuit diagramvii working of mobile jammercell phone jammer work in a similar way to radio jammers by sending out the same radio frequencies that cell phone operates on,this industrial noise is tapped from the environment with the use of high sensitivity microphone at -40+-3db.the pki 6025 is a camouflaged jammer designed for wall installation.an antenna radiates the jamming signal to space,a break in either uplink or downlink transmission result into failure of the communication link,the briefcase-sized jammer can be placed anywhere nereby the suspicious car and jams the radio signal from key to car lock,the circuit shown here

gives an early warning if the brake of the vehicle fails,because in 3 phases if there any phase reversal it may damage the device completely,reverse polarity protection is fitted as standard,2 w output power3g 2010 - 2170 mhz.this project shows the generation of high dc voltage from the cockcroft -walton multiplier,-20°c to +60°cambient humidity.mainly for door and gate control,go through the paper for more information,and like any ratio the sign can be disrupted.3 x 230/380v 50 hzmaximum consumption,.
